Dear Ingrid

Jorge has agreed to my nominating him for the president-elect elections.

As I'm sure you are aware he would have many skills to bring to the position

His base in North America places him in the heart of a resource equipped setting with state of the art care for children with neurological disability. He is an experience child neurologist and epilepsy surgery specialist.

In addition he has vast experience across many resource poor regions developing training and educational programs which go beyond short courses but include development of local skills and services.

This balance of promoting the best care for child neurology but also continuously aiming to lift the skills sets of other centres who are challenged by resource limitations and burden of disease, should be the mission / vision of the ICNA. I feel he full-fills this in his work ethic.

Please let me know if you need a more formal letter?

Kind regards

Jo
