**NOMINATION OF PROFESSOR PRATIBHA SINGHI
FOR ICNA PRESIDENT-ELECT, 2020.**

Professor Pratibha Singhi, currently Director of Pediatric Neurology and Neurodevelopment at Medanta, The Medicity, Gurgaon, Haryana in India, was formerly Senior Professor & Head of the Department of Pediatrics and Chief of Pediatric Neurology and Neurodevelopment at the Postgraduate Institute of Medical Education, and Research at Chandigarh, India.

She has had a distinguished career by international standards and she was a pioneer in many ways in providing service to children with neurological problems in India.

Her special research interest in infectious diseases of the CNS has resulted in many publications in neurocysticercosis and bacterial meningitis.

In addition, her interest and dedication to children with special needs has resulted in her involvement in establishing various landmark services for children with Cerebral Palsy and other neurodevelopmental disorders in India. For example, she was a founding member of Childhood Disability in her country and the Honorary Chief Consultant at Prayas – the Rehabilitation Centre for Disabled children, Chandigarh, since 1985. She introduced a model of home-based rehabilitation for children in resource-limited countries that has earned international acceptance. She also produced data on the long-term changes in the clinical spectrum of Cerebral Palsy in a large number of patients and discussed differences between developed and developing countries.

She has also been very active in the field of pediatric seizure disorders and has produced important work on the clinical management of seizures and epilepsy, as well as, on psychosocial problems related to childhood epilepsy.

She has authored a very large number of publications (462), 232 of which are published in international journals, as well as, book chapters and she has edited several books. Dr Singhi's book on "Seizures and Epilepsy in Children- A Practical Guide" has been a very important contribution for the care of seizures and epilepsy in her country and other developing countries.

She has been invited to give a multitude of lectures and to chair meetings in many Indian and international congresses and she has organized several meetings and workshops to train pediatricians and other professionals.

Professor Singhi has served as Executive Board Member of ICNA from 2014 to 2018. She is currently the Secretary General of the ICNA and she has been very actively involved in ICNA educational activities particularly in resource-limited countries.

In addition to the above, that actually represent a very small part of all the important things that she has done during her long career, Professor Singhi has the unique ability to inspire respect and at the same time warm feelings and positive attitudes to those who associate with her. This is due to her strong but benevolent personality and her obvious dedication to our common cause in helping the children of the world with neurological problems to have better lives.

For all these reasons I believe that Professor Singhi would be a great president for ICNA in 2022 and I nominate her for the position of President-Elect.

Antigone S. Papavasiliou, MD, PhD, FAAP

Head Pediatric Neurologist

IASO Children's Hospital

Athens, Greece

Letter of support for Prof. Pratibha Singhi

I highly recommend the nomination of the Prof. Pratibha Singhi for the post of president of ICNA for the next mandate. Prof. Pratibha Singhi has invested a lot in the development of pediatric neurology in his country and in many other regions around the world and has worked a lot for the development and blooming of ICNA. she has invested a lot in the development of pediatric neurology in her country, her region but also around the world. She has always been present when asked. His articles and books on neurological pathologies in children are a reference for neuropediatricians around the world. She has invested a lot in training young people in neuropediatrics and she conducted 24 educational meetings of the International Child Neurology Association across the world at places where Pediatric Neurology is not well developed.

Its activities and its contribution were not limited to scientific but also social activities. she is involved in the social work of disabling diseases in children. As president, she will continue to develop pediatric neurology all over the world and mainly in regions where she does not yet exist.

To the nominating committee,

ICNA

It is my pleasure to write this letter of support for the candidature of Prof. Pratibha Singhi , the current Secretary , for the post of President elect ICNA.

I think that over the years, Prof. Singhi has contributed a lot to all the activities of the ICNA and is well versed with the functioning of ICNA. Her international experience provides her with the unique ability of relating easily with people from various countries and she has remarkable leadership qualities.

I also think that since Dr Singhi is from a resource limited country, she would, if elected, truly exemplify the international character of ICNA.

I strongly recommend and support her candidature for the post of president elect

Thanking you,

Yours sincerely

Dr. Vinayan KP

Dear Members of the Nomination Committee

It is my pleasure to nominate Professor Pratibha Singhi for the post of President-Elect of the ICNA. Prof. Singhi has served the ICNA for several years and is now serving as secretary of the ICNA.

Over the years she has contributed a great deal to the ICNA and has helped to grow child neurology in a lower middle income country like India which has given her a unique perspective of the challenges faced in other such countries.

ICNA would be well served by a President from an Asian country to help grow this specialty in several of the world's underserved areas

I strongly support her candidature for the post of president elect

Thanking you,

Yours sincerely
