

My vision for ICNA is to make it the ***most dynamic and powerful organization that promotes global access to excellent care for children with neurological problems worldwide.*** I would like to consolidate the excellent work done by my distinguished predecessors and take it a step further, through these strategies-

1. **Enhance visibility of ICNA** - -use every opportunity to raise awareness about ICNA's goals and activities.
2. **Increase membership of ICNA** -exponentially, globally
3. **Disseminate Education to all professionals and caregivers** - Use innovative technology and teaching methods.
4. **Raise the international profile of ICNA –take steps to build its impact factor**
5. **Vibrant EB**- ensure involvement of ***All*** EB members in ICNA projects and activities –***each one do one!***
6. **Expand horizons, transcend boundaries!** tailor ICNA activities to the felt needs of various regions. Build Local Capacity: ***create exchange programs*** for training and skill development.
7. **Foster collaborative research** -global and regional, ***link senior mentors to young mentees.***
8. **Money matters!** -increase congress revenues, sponsorships, ***create an ICNA fund-raising committee.***
9. **Build Connections** –interactive collegial and organizational links; ***affiliate regional and national societies with ICNA; develop links with national/regional authorities to implement policies***
10. **Engage younger members** -amalgamate fresh ideas with wisdom of senior members, incentivise with junior research awards and scholarships. ***Link FLICNA members with each ICNA committee;*** ensure continuity and smooth transition of ICNA responsibilities to the next generation.

I believe my experience as EB member and Secretary has provided me deeper insights into the functioning of ICNA and ***I am now even better equipped to lead ICNA to scale greater heights.***

***(Pratibha Singhi)***
